Don't Take It to The Dump – Cash It In!

Recycle Unwanted Household Metal Goods with EH Metal Recycling

If you think Vancouver recycling for homeowners is limited only to what you can recycle at the curb – Think Again! Of course we always welcome your soda, beer, and other aluminum cans to our recycling center, but why not earn even more quick cash by also bringing us other items that are just gathering dust in your house, attic, basement, or shed?

Q: What does Ferrous and non-ferrous mean?

A: Non-ferrous metals are materials whose value is NOT derived principally from iron and are NOT magnetic. Where Ferrous Metals consist mostly of iron (Tin/Steel) and ARE magnetic.

Here is a list of Metals Examples. This is just SOME of what we take at EH Metal Recycling accepts and processes both Ferrous and Non-Ferrous metals. Also Vehicle & Catalytic Converter.

Products that are Ferrous consist of: Tin/Shred, Steel, Cast Iron Products that are Non-Ferrous consist of: Aluminum, Copper, Brass, Lead, Nickel and Stainless Steel alloys
